

Rotary Products

MacArtney supplies a wide range of rotary products for all winch applications.

MacArtney supplies, installs and services rotary products from Focal (MOOG Component Group), supplier of rotary technology products and services. Focal standard or tailor made rotary joints are widely used in the offshore, oceanographic and seismic industries.

Rotary products are often offered as integrated elements to winch systems. We can also offer spares and servicing.

Rotary products and services include

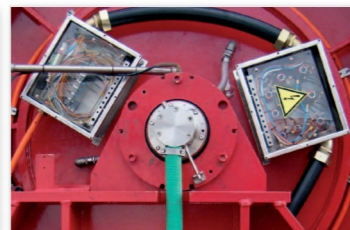

- High voltage support
- Single or multi mode fibre pass units
- Combined single and multi mode fibre pass units
- Fluid rotary joints
- Pressure compensated rotary units
- ATEX and IECEx certification
- Strategic servicing locations at MacArtney facilities worldwide
